2 October 1975

MEMORANDUM FOR THE RECORD

SUBJECT: Conversation with Greg Rushford on 2 October 1975

25X1

25X1

- Rushford came to my office by pre-arrangement through to discuss the record with respect to Portugal.
- 2. We spent some time at the beginning in a back and forth discussion on Cyprus and the press stories of yesterday and this morning alleging that the CIA knew of the coup, failed to tell the Ambassador, and promised the government it wouldn't happen. I made clear my opinions of the unrealism of that line and he dealt with it by refusing to take responsibility for what his superiors on the committee staff said. He indicated intent to talk more to the DDO people.
- 4. We spent a considerable amount of time on general questions of what can and cannot be predicted in intelligence. And he finally asked me many questions about the differences between the NIO system for producing estimates and the former BNE system. He is clearly primed and determined to promote debate on which was better, the NIO or the BNE, and I could only say it depends on what your perspectives and needs are, describe strengths and weaknesses of both, etc., etc. I did try to dispel the simple-minded notion that the old system would have guaranteed advance and precise warning of the coup, and in general discussed the differences between current- and long-range analysis and estimating.

- 5. Although Rushford is hardly one to be trusted on the record of performance so far, his line today was one of entire reasonableness and a general posture of wanting to strengthen civilian intelligence. He was very kindly in his references to Bill Colby.
- 6. He did say that the committee would be holding hearings on Portugal next Tuesday (7 October) but had no idea now who, if anybody, would be called.
